Malappuram, Kerala

OUR HISTORY

Educare Institute of Dental Sciences, established in 2007 were one among the top dental colleges in Kerala. Today, it's risen to claim the status of one of the top institutions in Kerala conferring a dental degree. This institution provides quality dental education that is at par with modern dentistry taught and applied in world dental curriculum. Equipped with state of the art facilities, the institute plays an appreciable role in the comprehensive development of its students.

ABOUT US

OUR GOAL

As the leading Dental Colleges in Kerala EIDS is committed to impart every student with excellent dental health knowledge and supreme skill for the successful practice of dentistry.

The focus of theory and practice at EIDS is on prevention, diagnosis, and treatment of dental anomalies and diseases with professional integrity and compassion. Conducting research among the local community to develop baseline data on the prevalence of dental diseases and finding effective methods to prevent and control them.

Facilitate quality dental care treatment at an affordable cost to every stratum of society. Free health camps to create dental health awareness to the larger public

“

Equipped with state of the art facilities, Educare Institute plays an inspiring role for the overall development of its students.

APPROVALS FROM REGULATORY BODIES

Recognised by the Ministry of Health and Family Welfare.

Educare Institute of Dental Sciences is affiliated with the Kerala University of Health Sciences (KUHS) and approved by Dental Council of India (DCI). Established in 2007 Educare Institute of Dental Sciences has risen to attain the status of one of the top institutions in Kerala for dentistry.

OUR VISION

To be the centre of excellence in dental education in India and improve the dental health of the people by providing quality dental health care.

OUR MISSION

DENTAL EDUCATION

To impart adequate knowledge, necessary skills and a positive attitude necessary for the successful practice of dentistry involving prevention, diagnosis and treatment of dental anomalies and diseases and to be useful member of the society. To conduct relevant research within the local population to establish the baseline prevalence of diseases and monitor them on a long term basis to form strategies to control these diseases.

DENTAL HEALTH CARE

To provide equality treatment at affordable prices to the different strata of the society
To organise free dental treatment camps and dental health awareness camps to impart basic dental treatment and increase health awareness within the society.
